

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Reporting Requirements Not Met for CAMERON WATER WV3302603

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

What happened? What is being done? (Describe corrective action)

Please reference years listed above. These are all old violations that are just hanging out under the State. They don't just fall off. The utility has to send Public Notice. This is being sent to allow the violations to be removed from record. With these removed Cameron Water will have ZERO violations to date.
