

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Reporting Requirements Not Met for
CAMERON WATER WV3302603

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

Monitoring Violation	Year-Fed Report #	Monitoring Frequency	Compliance Period
41, CHLORINE, FAILURE MAINTAIN MICROBIAL TREATMENT, Failure to Maintain 4-log Treatment of Viruses Free Chlorine Level Below Required Minimum	FY1994 – 129993	Monthly	Sept 1993

What happened? What is being done? (Describe corrective action)

Please reference years listed above. This is an old violation that is just hanging out under the State. Violations do not just fall off. The utility has to send Public Notice. This is being sent to allow the violations to be removed from record. With these removed Cameron Water will have zero violations to date.

For more information, please contact Jeff Gardner at 304-686-2366
(Contact Name) (Phone Number)
 or 44 Main Street Cameron, WV 26033
(Mailing Address)

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
